

The background is a grayscale photograph of an industrial refinery or chemical plant, featuring complex piping, distillation columns, and storage tanks. A large, semi-transparent white hexagon is centered over the image, containing a light gray molecular or network pattern. The text is overlaid on this hexagon. The word 'OIL & GAS' is in a large, bold, sans-serif font, with 'OIL' in green and '& GAS' in black. Below it, 'ThirdEye Systems' is in a smaller, bold, black sans-serif font. At the bottom of the hexagon, the tagline 'making systems smarter' is written in a smaller, lowercase, black sans-serif font. There are four small gray dots at the corners of the hexagon, connected by faint lines, suggesting a network or data flow.

# OIL & GAS

**ThirdEye Systems**

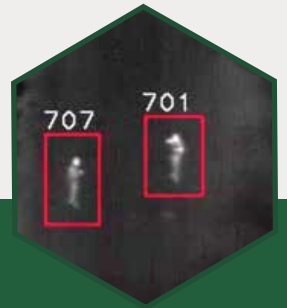

making systems smarter

The Oil&Gas industry is the power source of every nation, and as such, due to the complex operation, it's considered critical and vulnerable facility that hard to protect due to vast ranges of oil pipe, manifold and open facilities, as well as maintenance, hazards measures are costly.

Our automated platform provides high quality aerial data for all inspection and maintenance requirements, in a safer, more efficient manner, without causing operational down-time with constant security missioned monitored aspect. This innovative, consistently available aerial perspective of operations.

## SYSTEM ADVANTAGES:

- Immediate aerial information of routine
- Routine system inspections to ensure consistent operational integrity
- Access to hard-to-reach areas
- Situational awareness beyond opticals and in remote areas
- Intrusion alerts- for humans, drones and vehicle
- Autonomous mission and route plan
- No man in the loop
- Cost effective
