

TESSERACT

ThirdEye Systems

making systems smarter

Analytics enhancement for cooled and uncooled payload.

The Tesseract will upgrade any payload from passive operated observation device to state-of-the-art drone detection payload by enable it to detect, recognize and track drones in the sky.

All done by our powerful unique algorithm.

- Analytics for off-the-shelf EO/IR systems, cooled and uncooled
- Embedded with high-end processing computer
- IP 65 standard
- ATR and Tracking capabilities
- Multiple objects recognition
- Applicable to other objects- human, vehicle, motorcycle
- Low power consumption
