

# Veye&Feye

TECHNOLOGIES THAT MAKES A DIFFERENCE

## Feye

360 peripheral vision, day camera and wide key harnesses. Enables the installation of an environmental awareness capability for fighters in an anti-tank missile system or a tank. Human detection capability based on an advanced AI algorithm to detect traffic information in each camera. Operationally proven in working on armored vehicles in complex field conditions.

- Field Proven
- IP67 ruggedized Scenarios
- Day/Night Capability

## Veye

Capability of short-medium range investigation from an armored rocket launcher. Improves the ability to understand the environment, the ability to synchronize with Feye perimeter protection systems for locking and tracking. The ability to detect drones and people is understood in order to activate a permanent automatic scan and .protection from aerial and medium-range threats

- Dark conditions
- Complex Scenarios
- All Weather Operation – IP 67

Embedded Tracker for "follow me" mode

Embedded Edge Computing

Thermal and Vis Sensors

Integrated C&C for all sensors

Proprietary Fusion Technology

Wide Field of View - 90°
